

ITAS 164 Project Synopsis

Ethan McCagherty, Joshua Mesic, Leke Shehu

11 March 2024

Project Management Methodology

- Scrum
- Kanban
- Version control using git

Reasons for scope changes

- Inability to for script to boot on start so we changed our scope to use remote desktop instead
- Did not add keyword response to activate todd because we didn't feel it was necessary for version one of todd

Things that were left undone

- Auto switching personalities
- Faster responses from todd
- Todd saying simple phrases when activated

Lessons learned

- Remembering the importance of team communication and collaboration
- Recognizing the weight of time management
- Refining the ability to to be a project manager
- Building rapport with team members

Good points/bad points

- **Good points:** managed to get it running and works as intended
- **Good points:** acquired knowledge in problem solving skills
- **Good points:** remained resilient in the face of problems instead of just giving up
- **Bad points:** initial communication was not ideal
